DOGCHECK 4.0

The **Health Analysis** for **Breeders** and **Dog Owners.**

Our **DogCheck** provides you with the opportunity to examine **up to 220 breed-relevant** and **common health conditions** for your dog through a **single DNA test**. We assist you in identifying genetically caused diseases and avoiding them in breeding.

With our DogCheck, you can identify potential health issues before they arise and, if necessary, work with your veterinarian to develop early treatment strategies.

The New DogCheck with genetic diversity

ONE FOR ALL

Developed through collaboration between **geneticists** and **veterinarians**, the DogCheck is designed for use with both **purebred** and **mixed-breed dogs**.

220 IN ONE SWEEP

With DogCheck, we examine your dog for up to **220 genetic diseases**, providing valuable insights into their genes and essential information on **metabolism, immune system, organs** and **genetic diversity**.

COST-EFFECTIVENESS

Your cost-effective path to comprehensive health screening for your dog. Gain significant insights at a modest price - perfect **for dedicated dog owners** and **conscientious breeders**.

COMPREHENSIVE KNOWLEDGE

Examines up to **220 genetic diseases***, **coat** and **body traits** as well as **genetic diversity**.

CONVENIENT

- Easily order online and apply at home.
- A simple swab of the mouth mucosa is all that's needed for the sample.

QUICK

- Results are delivered in the shortest time possible.
- Results are provided online via our new myFERAGEN platform.

CLEAR

- Results are sorted by affected organs for easy reference.

SMART

- The result/genetic status is listed as individual results for each disease tested.

For more information, visit: www.feragen.at/dogcheck

*The number of testable diseases, body and coat traits depends on the breed of the dog.

Accessing your test results is as simple as can be.

1. Order a Test Kit from our Online Shop

Purchase the desired analysis from our online shop.
For more information, visit shop.feragen.at

2. Register Online

Sign up on our new myFERAGEN platform and create your dog's profile.

3. Take Sample

Collect a sample from your dog..

4. Send Sample

Return the collected sample to our laboratory.
